Description
This should be discussed. Not decided if we want it.

This would be useful for the import from MediaWiki people because this is a setting in MediaWiki. Now, after import, users must go in each page and add maketoc.

This would be a site-wide setting (overrideable per workspace). Would need to have a way to turn off for a page (ex.: with a wiki syntax)

Solution
Done in 12: http://doc.tiki.org/Auto+TOC
