Description

I can't add an SVG image.

Even with HTML enabled, it will add an tag into my <object> tag preventing me from using SVG images.

With SVG already being an important element on the web, this is unexcuseable and needs to be fixed asap.

Solution

Don't break <object> Tag or support

Priority

I just found Mod SVG (<http://doc.tikiwiki.org/tiki-index.php?page=Mod+svg>), but not being able to add svg right away is a bad joke.
