Description

I have a comment on a wiki page. When I click Reply to post a follow-up comment, I get an error. It looks like the Reply button is generating a bad URL:

__Not Found

The requested URL

/mywiki/page=IVR_Revitalization&post_reply=1&comments_threshold=0&comments_reply_threadId=5&comments_offset=0&thread_sort_mode=commentDate_asc&comments_per_page=20&comments_grandParentId=0&comments_parentId=5&thread_style=commentStyle_plain was not found on this server.__

This would be a show stopper using Tiki threaded comments is very important feature requirement for us.

Thanks,

Paul

Workaround

Deactivate CleanURLs
