Description

when downloading a file from the gallery with IE the result is corrupted. Firefox or Chrome have no problems.

This is related to the general IE(5/6/7/8) inability to handle compressed files correctly.

Tried various suggestions in .htaccess with no result.

example:

```
SetOutputFilter DEFLATE
```

```
SetEnvIfNoCase Request_URI \.(?:exe|t?gz|zip|bz2|sit|rar)$ no-gzip dont-vary
```

the file gallery module is serving from file system, not from the database.

A zip file in the filesystem served by apache directly works fine.

Found a workaround. Set IE to not use the http 1.1 protocol, flush the cache and restart the browser. There is a ton of similar issues with IE 5/6/7/8. Other than completely prevent any zipping of http data there seems no solution available.

hansnouwens 05 Mar 10 15:25 GMT-0000

Moved the complete site to another provider. They seem not to have this issue.
