Description
My application use category on groups and objects
I tried category transition in tiki4, to be honest without reading anything, the result is catastrophic:
I cannot admin all my tiki because i have lost my rights as administrator.
In my SQL database all records in users_grouppermissions table have been deleted
How can I retrieve my rights?
Can I manually write admin rights in my database?
thanks

You can repopulate the table users_grouppermissions manually - at least but for one on the group you are in a tiki_p_admin to be able to use admin->groups again

OK good thanks very much sylvie, but this main change in category is really dangerous

Marc Laporte 24 Nov 09 10:20 GMT-0000

Category transition doesn't delete anything
