Description

Bug:

- New all-day events are not created.

To reproduce:

- Create an event, select a start-day in the future, select "All-Day", and then save it.

Reason:

- The event doesn't get created because the end-day is before the start-time.

Problem:

- This is confusing for the user.
- No error message or warning is generated.

Solution

When the user selects a start date/time, the end date/time should be updated so that it is equal to (or maybe an hour greater than) the start date/time.
