Description

IRC-Log 20050705

22:38:53 <amette> ahum - it looks to me, that we loose data on tw.o and on dev.tw.o after site-updates - please have a look here:

http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId=257&show=view&status=o&trackerId=5&sort_mode=f_41_desc&filterfield=26&filtervalue26=tracker

22:39:36 <amette> luci added the solution as far as I remember (lastmod is empty) - later on I closed this item with solution Accepted and a modification to the solution

~~-some stuff cut -~~

22:49:50 <amette> The thing with tw.o is, that I know exactly I edited a page - later toggg told me, that I didn't make the change, hm, well, yes, it was lost.....

The page in question is

<http://tikiwiki.org/tiki-index.php?page=FindTikiExpert>

No one can confirm that with their own Tiki.

I really don't know what it could be (site updates) - but it scares the hell out of me.... well, almost ;)

Solution

Just a rumour ? What to fix if we have no more details ?
