Description

I have installed tikiwiki 4.1 on hostgator. When I login from firefox it doesn't take me to the next page which contains admin menu and logout option even after successful login. If I login from IE, problem doesn't arise while login in but at logging out same problem arises i.e. it still shows admin menu.

http://universalhumanvalues.info/tiki42/tiki-remind_password.php

It takes me to admin without any login and then
my site is behaving competley wierd, not page refresh, no able to set any setting through admin.
