Description
The ldap_sync_user_and_groups function is missing the $user and $pass arguments (types, or whatever you call them). This means that when using LDAP the user will not be added to the LDAP groups and the user's information (name, email, etc) will not be populated. I have a fix listed below, but I don't know if it will break something else.

Solution
I "fixed" this by changing line 847 from:

function ldap_sync_user_and_groups() {

to:

function ldap_sync_user_and_groups($user,$pass) {

Should be fixed in Tiki 5.
