### Description

This happens in Tiki4 when using session\_storage in the database (which was not the default) when using PDO (which is now the default in Tiki4)

### Solution

This will probably be never fixed in Tiki4 so just upgrade to Tiki5, where it has been fixed properly.

### Workaround

1- use ADOdb as described at <http://tikiwiki.org/ReleaseNotes40>

or

2- With phpMyadmin (or similar)

go to the table tiki\_preferences

Find the line about session\_db being equal to y and delete it (it will then be restored to the default of no.
