It seems that if links are in the `<description>` tag of an RSS2 xml. With Firefox (or equiv) see http://scourgeweb.org/svnlogs/log2-rss.xml for an example of how it should render.

It does not render correctly in the RSS user module. The link URLS are broken and don't include the `<a href="domain.tld/path">` only the link description of the path is displayed.

**Demonstrate Bug**

Please demonstrate your bug on show2.tikiwiki.org
Is this still an issue? If so please update the version information the the ticket.
