Description

Add group watch to articles

This way we could also have all users informed about community news , etc. in tiki sites.

In fact, the best option would be what it's done with newsletters: subscribe that bunch of users from a group, and let them unsubscribe it they wish and when they wish, without admin action. But if no action is done, they all get the copy of the article at their email, etc.

Solution

This was done in r31767 on trunk, for Tiki 7.
