Description

there is still that issue sometimes with the error undefined "thread sort mode" if you preview an answer before posting it at tw. forums.

It heppened to me again when attempting to reply to a thread with a comment already, and I previewed my post first before attemptint to post it.
When I clicked on post, I saw that message.

TW.o is currently using tiki5beta1 r26677

Workaround

As suggested by sylvie months ago (in 4.x, I think), the workaround is to enable the setting in Admin forums: "enable setting thread preferences per forum" (or similar name of setting).

And then, on a forum per forum basis, set the default thread sort mode.
