Description
Tracker 12:
64 group selector 1
66 user selector 1
65 attachment
79 textarea 0,100,3,3000

{ _TRACKER(trackerId="12" fields="65:79" showtitle="n" showdesc="n" showmandatory="y" sort="y" view="user" newstatus="o") } Thanks! { _TRACKER }

does not assign the fields 64 and 66.

Related: 3186, a regression reported on the user selector field, which had a work-around by setting view="user" and excluding the user selector field from the fields parameter.

Solution
none

Comments

Xavier de Pedro 30 May 10 17:31 GMT-0000

try with all fields, something like:

```{_TRACKER(trackerId="12" fields="64:65:66:79" showtitle="n" showdesc="n" showmandatory="y" sort="y" view="user" newstatus="o")}Thanks!{_TRACKER}```

Gergely 30 May 10 18:32 GMT-0000

solution is described in

in short: hide the field for everyone except for admin, and add it to the fields. This works for both the group and the user selector fields.

One drawback in TW5.0B1: the field labels are shown in both cases. As long as it is not fixed, one could use pretty trackers to circumvent this problem.

Gergely 14 Jul 10 18:43 GMT-0000

@registration no pretty tracker can be used, so the proposed solution is not applicable
Gergely 14 Jul 10 18:55 GMT-0000

**FIX** tracker auto-assigned fields shown in the tracker plugin (or not assigned if not listed in the fields param)

Gergely 14 Jul 10 18:58 GMT-0000

If the submitted behavior interfered with someone else's opinion, I suggest using the optional field notation to express if these fields should be shown. The optional fields are prefixed with a '-' sign in the fields param.
