Description

External feeds don't show anymore the date of the feeded content, and they used to do while in Tiki3. After upgrade to Tiki4 and Tiki5 (or with new Tiki5 installs), dates are not shown any more.

The problem might be in the Tiki providing the feeds, not the tiki getting them.

E.g.:

<http://moviments.net> (using Tiki 3.5 by the time of this bug report) is set to fetch in a module in the right column (called "Altres esdeveniments") the feed from a site with Tiki 5rc2 (from svn) here: http://intercanvis.net/tiki-calendars_rss.php?ver=2

Previously, the right modules in moviments.net was showing the dates properly of each calendar item fetched.
