Description
Google adsense does not display.
This error occurred in FiveAlive and "thenews".
I tried using "Banners".
I tried using "Template".
I tried using "Module: AdSense".
I tried using "Module: User".
I tried using "HTML plug in".

In an Article and Blog, I used the HTML plug in, authorized the HTML, and nothing displayed.

By experimentation, I added the carat (box) around the plug in, and it displayed in PREVIEW mode. But when I saved it, an empty box with no adsense text displayed. (No, the carat didn't trigger it, just was the reason I previewed it.)

"Allow HTML" box is checked.

When I look at the page source, the HTML is there.

<script type="text/javascript"><!-- google_ad_client = "pub-0000000000000"; /* 468x60 wiki */ google_ad_slot = "9690243348"; google_ad_width = 468; google_ad_height = 60; //-->
<p></script> <script type="text/javascript" src="http://pagead2.googlesyndication.com/pagead/show_ads.js">
</script>
The xhtml br / is the only discrepancy that I can find between the "PREVIEW" versus the "SAVED"

version.

I found one work around that eliminates the XHTML BR / . Delete the line feed between the last two lines of code. Then AdSense displays correctly.

Still haven't figured out why the Banner HTML code is not running.

jetgraphics 02 Jul 10 08:29 GMT-0000

The work around doesn't always work. It appears that the HTML plugin inserts extraneous ending breaks . I keep editing them out, but the plugin keeps plugging them back.
