Description

I have the global permissions set so that individuals can change the permissions of certain features. However, when doing so, the users are getting an error message on the tiki-object permissions file.

Notice: Undefined variable: tiki\_p\_admin\_wiki in html/tiki-5.0/tiki-5.0/tiki-objectpermissions.php on line 36

Warning: Cannot modify header information - headers already sent by (output started at html/tiki-5.0/tiki-5.0/tiki-objectpermissions.php:36) in html/tiki-5.0/tiki-5.0/tiki-objectpermissions.php on line 469
