Description

I have a drop-down-with-other field with value 0 (zero) as default in a tracker form (so options for that field are "0,0"), but when I see the tracker dropdown to insert items, the drop down gets populated with some string about the sandbox...

still occurring in latest baraches/6x (r30164)

Solution

well, I'll avoid that issue by not using 0,0 as options, but either "0","0" instead (which seems to show the text ok, and not the wrong label about the sandbox), or text field with jq prefill for default value

for completeness of description: with 1,1, the drop down shows correctly. The issue is just with 0,0, it seems
