Description

When pages are added to a structure, they appear in chronological order. Placing the pages in order is extremely time intensive. Please consider creating one or more of the following options:

- 1) A menu choice for alpha sort on a per level basis.
- 2) The ability to drag and drop entries. (See Netflix queue page.)
- 3) The ability to manually renumber the page order value and then update all. (See Netflix queue page.)

Additionally, please note that positioning pages by using the up/down icons sometimes creates apparently random placement:

1. One
2. Two
3. Three
4. Four

Selecting the up icon from "3. Three" can sometimes result in:

1. Three <<<< out of place
2. One
3. Two
4. Four

instead of

1. One
2. Three <<< where it should have gone
3. Two
4. Four

Thank you!
