Description

Hi,

Into the wysiwyg help on plugins, the height of the scroll list of plugins is superior to the eight of the popup. So the bottom of the list and scroll commands are not accessible.

The height is calculated from the height of the popup with is resizable.

enhance request : set a button into "plugin" to select the suitable plugin.

May be change tooltip of help to Help "Help on wysiwig syntax and plugins" rather than "Wysiswig"

The plugin manager should include the "help plugin which is into help", after the choice of plugin the manager help to fill it and include it.

I imagine that's the working is doing but I just add may be my view of this part of the Wysiwyg implementation.
