Description

I tried to export a sheet that I made and it didn't work anyway. But I compared tiki-import_sheet.php and tiki-export_sheet.php and I found the error.

Solution

There is a line missing in tiki-export_sheet.php
(\$smarty->assign('sheetId',\$_REQUEST%22sheetId%22;). I put this code in line 31 and it worked, except for Excel format (there is something wrong with this format, even small and simple sheets don't get exported correctly - cells appear with an error message).

This might be fixed already in current Tiki versions (Tiki12 +). Can you please retest?
Thanks
