Description

This change was made because IE7 & IE8 has trouble with a page which starts with "<!-- TPL:". However, for a new developer, it's useful to know about tiki.tpl and error.tpl Suggested layout:

```
<!DOCTYPE html> <!-- TPL: tiki.tpl is used as the global page container --> <html
xmlns="http://www.w3.org/1999/xhtml" xml:lang="en" lang="en"> <head> <!-- TPL: header.tpl
--><meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
```

```
<!DOCTYPE html> <!-- TPL: error.tpl is used as the global page container --> <html
xmlns="http://www.w3.org/1999/xhtml" xml:lang="en" lang="en"> <head> <!-- TPL: header.tpl
--><meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
```

Solution

This was solved per the suggestion by r61822.
