Description

In Tiki 6.3, when using the 'Upload New Version' feature in the file gallery with Chromium 11 on Ubuntu 10.04 amd64, the file selection dialog appears, but when a file is chosen, nothing happens.

It appears to be an incompatibility with the browser, as the bug does not exist when using the following browsers/OS:

- Firefox 3.6, Ubuntu 10.04
- Chrome 11, Windows 7
- IE 8, Windows 7

Couldn't find anything on the chromium bug list or tiki bug list.

Any help is greatly appreciated!

Solution

Upgrade to Tiki 15.5, 16.3 or 17

Thanks for reporting Chris,
"Upload new version" got really broken in Tiki 14. We fixed this for Tiki 17, and possibly for 15.5 and 16.3: <https://dev.tiki.org/item5668#threadId=5505>

Long story short, it's not too clear why you had this issue prior to Tiki 14, but with the fix Jonny Bradley did, you certainly won't have issues with Tiki 17.
