Description

Updated from 5.1 to 7.0, now RSS Feeds not working. Also not working with 7.1 RC1.

Chrome browser reports HTTP Error 500 (Internal Server Error): An unexpected condition was encountered while the server was attempting to fulfill the request.

No page displaying in firefox. Tested on Blogs and articles, both have same error. PHP-XML is installed (report of this error in community section discussed PHP-XML as being the solution)

This is RSS feed

Please enable error reporting from admin > general so we can get a tip about what is going on.

Tiki uses Zend_Feed to write the feeds. That component uses the PHP dom extension, which is enabled by default in PHP. Some distributions might decide otherwise.

nilssondenver 27 Jul 11 21:52 GMT-0000

PHP Fatal error: Uncaught exception 'Zend_Feed_Exception' with message 'Invalid parameter: parameter must be a non-empty string and valid URI/IRI' in

The above is in my error log when I choose the RSS feed icon for the blog
According to host provider PHP dom extension is on

Louis-Philippe Huberdeau 05 Aug 11 20:15 GMT-0000

Hello,

The issue is now resolved in trunk and 7.x. It will be part of 8.0 and possibly 7.2 if it ends up being released (which will be a little while as 7.1 was released really recently).

The patch to resolve the issue is very small. You can get tiki-blog_rss.php and tiki-blogs_rss.php from subversion and just replace them. Disabling sefurl would also fix the issue.

Thank you for reporting the issue. However, being so insistent about it was not required in all of Tiki's presences. I had the issue on my plate, I just happen to have a lot more in there.

nilssondenver 08 Aug 11 21:42 GMT-0000

Many thanks for fixing this issue. It can be a daunting task knowing where is the most appropriate place

to ask a question. Thank you for your time, I have uploaded the 2 files to my site

http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki/branches/7.x/tiki-blog_rss.php?revision=35865

http://tikiwiki.svn.sourceforge.net/viewvc/tikiwiki/branches/7.x/tiki-blogs_rss.php?revision=35865

and I now have working RSS feeds for blogs

Thanks again
