Description

On the Manual database installation docs:

http://doc.tiki.org/Manual+Installation#Rename__htaccess_for_clean_URLs_optional_

Instruction 1.4 says

1.4. Rename _htaccess for clean URLs (optional)

You can rename _htaccess to .htaccess

--

BUT in the files there is only htaccess.sh

SO, is this the same file as _htaccess?

Really want to change the name of htaccess.sh to .htaccess.sh?

Low priority since this is an Alternative. But it does prevent manual installations from having clean URLs

Solution

Change the text so that it is correct
