Description

We have a wiki page which has the plugin for RSS feeds. We upgraded from version 3.0 to 6.6 and now the RSS feed plugin no longer works. We have been unable to find a solution on our own and don't know if this is something we overlooked, don't know about or it is an actual problem.

I don't see this reported.

Is the feed external or internal ?

I try with an external and it's working : <http://dev.tiki.org/Changi%27s+test>
