Description

The calendar in TW6.7 does not render correctly in IE8. It shows two months worth of dates instead of the expected single month when in month view. Week view and day view render correctly in IE8, though.

Also, amazingly, the same install of TW6.7 shows the dates of the month of March when viewed with IE8 and April (the current month) when viewed in IE9 and other major standards compliant browsers.

Workaround

This issue is addressed by changing the Displayed Time Zone setting under Admin | General Preferences to 'Use site default to show times'.
