Rating

★★★★★ (0) ?

Description

Using my version is 8.4 (MyISAM), installed via softaculous, when WYSIWYG is enabled the editor does not show up on the Admin>ContentTemplate page. I looked at the generated source code where the editor should appear and what it shows is this :

```
<tr>
<td/>
```

instead it should show:

```
<tr>
<td>
(code for WYSIWYG editor goes here)
</td>
```

Both features work fine independently, just not simultaneously.

Importance

I don't know how to escalate this, but it seems a fairly significant bug for those who use wysiwyg.
