Description

After I select to use the database connection, tiki-install returns blank page.

Error message logged during a few retries:

apache-2.2.22, php-5.4.4, gentoo install

tiki-8.4 runs fine

Hi

Is this a clean install, or an upgrade?

I'm guessing it's an upgrade and you are using the Image Galleries (as the stack trace reports tiki-browse_image.tpl is involved).

Image Galleries have been deprecated and marked as not to be used for several versions now so maybe try turning them off in 8.x before upgrading?

Thanks for the feedback, we'll try and find a way round it anyway of course.

jonny

Scott M. Sanders 12 Sep 12 18:30 GMT-0000

I got that fatal error too, but only for a few custom icons that I filled in on main menu #42, on updating 8.3 to 9.1 by just overwriting.

In short, going to temp/cache and removing all files but index.php fixed it, and I've had to do this before for issues with older upgrades too. Just clear your (Tiki) cache.
