Description
• Select some tracker fields with the checkboxes
• Select in the dropdown at the bottom: export selected.
• Click at go

Some popup box is shown, but no fields exported.

This (equivalent feature to export tracker fields) was working in tiki6

---

Tracker export failing: fyi, it might be related to the length of the tracker (and/or the internal url that is generated). Tracker has 55 fields. When I remove the last 20 (or so) fields: export fields works. when I remove the first 20, instead (in another clone of the source tracker), it works also
