Description

Using a numeric field in a trackers auto generated "new tracker item"-page is a bit difficult. The numeric values are set to "text-align:right" by ./styles/layout/design.css (.numeric, td.numeric). This makes sense at first glance.

Problem is when using Safari as browser the up/down arrows which are positioned *within* the input field and not right of it and so they do cover the first two or tree digits of the input which therefor isn't readable.

See the cursor position (vertical dash) in screenshot right of the arrow control -there the first digit will go.

Here you can (not) see what happens after typing "222"

Using Firefox this problem does not occur - no up/down arrows at all in Firefox.

Solution

Better: No up/down arrow control at all like in Firefox. Anyway they are useless most of the time.
Best: Up/down arrows control is positioned after/besides input field when using Safari, not within.

Workaround

Change .numeric, td.numeric styles in design.css to "text-align:left" . Not beautiful but working.

What is your SourceForge.net username?

Thanks!

Uwe Altmann 01 Jan 13 17:22 GMT-0000

I've got none so far. But the patch für the workaround is attatched here - maybe it's easier you commit that for me.
