Related-to

- ✖ User registration with anti-bot & user tracker for additional information not working

Description

Using a pretty tracker as registration form doesn't allow to de-activate the captcha.

Since one of the point of using a tracker for registration is to allow special questions which robots can't answer, what is the point of forcing the use of the captcha (through which robots can easily pass)?

Maybe a duplicate of bug #1818, I'm unsure.

SHOW admin password: 01234

Workaround

Either don't use a pretty tracker or accept to have a captcha
