Description

The "PluginTrackerCalendar" (fullcalendar resourceviews) needs annual view (for project management)

Because real projects last more than just a month... and managers want to see the evolution over time (monthts)

Moreover, we need "filters" for up to 3 tracker fields to control de display of data from the tracker

3 tracker fields because you usually want to review by:

(1) user/s,

(2) dates,

(3) a field related to the project itself (priority, custom field such as project type, etc)

A basic attempt is using plugin custom search, but I don't yet get the right syntax to filter events in the trackercalendar based on the results of the dynamic filter specified by the user.

Reproduced:

<http://xavi-9794-4391.show.tikiwiki.org/tiki-index.php>

u: admin

p: 12345

Workaround

You can use the filtering provided by Plugin List:
See:
http://doc.tiki.org/PluginTrackerCalendar#Example_2

Reproduced here, filtering by one author (user1):
<http://xavi-9794-4391.show.tikiwiki.org/tiki-index.php?page=HomePage>
u: admin
p: 12345

However, a better approach would be to expose a variable with checkboxes, or similar, so that you can choose which optional values from that variable you want included in the view.
Example:
<http://www.mikesmithdev.com/demo-fullcalendar-with-event-filtering/>
