Description
r45987 - still a problem in r46589

FILES plugin (in either the wiki or wysiwyg (full html) editor) is not working correctly as follows:

- the "FileID" parameter is being ignored - FileID list should allow just specific files to be shown.
- if the "Show Parent Gallery Name" (showgallery="y")is set, then the table headings/contents get out of alignment
- ~~Plus in the WYSIWYG editor it now breaks completely producing garbled content. THIS OK NOW~~

Solution
r47139 should fix the show parent table mess issue.

Yep - thanks Jonny - all fixed now and the documentation updated by changes to the _info section of the plugin code - this should show on doc.tiki.org when it re-synchs with svn

Workaround
unset the galleryId to get fileId to be recognised

Priority
