Description

I'm creating a Tiki site with several small reusable bits of content (as Wiki pages). Cell phone users are my primary audience, so I'm relying on HAWHAW and HAWIKI. I'd like to use INCLUDE module or structures to reuse the content. Tiki handles it fine, but my mobile tiki doesn't support either INCLUDES or Structures. The INCLUDE lines pass right thru unparsed.

1. Is there an easy way for me to get INCLUDE to work?
2. Is it planned for support in a later release?
3. Are there plans for support for Structures?

Thanks for HAWHAW, it's great!

Rob

Solution

Starting in Tiki7, Mobile support is via jQuery Mobile and this supports pretty much everything the regular site does.

Went looking @ mobile.tw.o and could find no relevant information on structures. Site appears dead with no movement for 2 years.

Have documentation site and would like to allow iPhones and WinMo phones to access docs.
