Description
If the XMP Zip export of a Structure is used, the first time use works fine - but if you then try to export a different Structure it just exports the 1st again. Repeated swapping to try and export another/different Structure does occasionally export the right one (haven't worked out the logic of when its OK) but generally it gets it wrong.

Can't reproduce at the moment. Tried exporting all of the samples created on SHOW and worked flawlessly.

thanks

~~I've downgraded the priority on this as it may be some strange manifestation of my private test site - if anyone has some time and wants to looks at my test site it would be appreciated since the issue is definitely happening there !~~

OK the bug is now reproduced in the 'show' url - see the site for more details

Really odd !!!

I'm unable to reproduce it on nextdev.tiki.org
Could you create a show.tiki.org and demonstrate please.

Pascal St-Jean 26 Aug 13 01:30 GMT-0000

Can you to a screen capture of what you are describing. I've tried exporting in sequence and randomly
using the SHOW that you created and I've been able to successfully export each time.

thanks

Geoff Brickell 26 Aug 13 07:51 GMT-0000

emails sent to both Changi and Pascal about how this error is happening on my test site but not on the
'show' site - which means either:
- I have not fully recreated the conditions on the 'show' site or
- my test site is corrupted in some way and these errors there are an aberration

Would be nice to understand which
