Description
Slideshow is not working anymore since I upgraded the site to Tiki11, (I also changed the style to coalesce).

http://sustainability.seeds4c.org/tiki-slideshow.php?page=Session+02

or

http://sustainability.seeds4c.org/show:Session%2002#s1

show the same wiki page, with no slides.
Those same pages upto tiki10 produced slides in a slideshow.

Workaround
-- The bug dissapeared when I enabled js minification (tiki_minify_javascript).

If I disable tiki_minify_javascript again, then slideshow breaks again.

However, after a while, if I disable it, it seems that slideshows keep working! (weird)

However, I'm unable to reproduce on show.t.o. It works regardless of js minification. Maybe the multitiki setup is needed to reproduce the bug?
