Subject
Tracker history tracking issues was: Trackers inline editing: data is not added to tracker history

Version
11.x
12.x

Category
- Conflict of two features (each works well independently)

Feature
Trackers
History (wiki, tracker item, sheet...)

Resolution status
Please retest

Description
Here is an example:
http://dev.tiki.org/Monitoring#Wishes

- Changing from empty to something doesn't go to the history
- Changing from something to something else does go to the history

Solution
I had checked this issue in both trunk and 12.x. Now it's working.

@Mani: I just tested on dev.tiki.org (which is now 12.x and it's not working. Changing from empty to something doesn't go to the history
{flash type="url" movie="display555" width="943" height="453"}

Updated:

Now I fixed this issue.

Please check this commit id: 48405

@Mani: it's not reliable. I did inline edits for these two:

http://dev.tiki.org/tiki-tracker_view_history.php?itemId=4758
Added the scores OK, but it removed the Category

No show instances.
Misleading descriptions.

It has nothing to do with inline editing.

The issue seems fixed. It might have been about the field not being visible (whatever that is). And that would have affected the basic tracker edit form too.

Closing this bug until someone reproduces it in a valid environment. (dev.t.o isn't one).

Marc Laporte 29 Nov 13 00:45 GMT-0000

dev.tiki.org is a real World use case. I can improve bug report though...

I made some screencasts but they are no longer visible because of another bug:
http://dev.tiki.org/item5007

There are a bunch of false positives here:
http://dev.tiki.org/tiki-tracker_view_history.php?itemId=1199

In version 1, these three make sense

- _Status_
- Lastmod by
- Resolution status

All the others are false positives

Thanks!

Marc Laporte 29 Nov 13 01:40 GMT-0000

I only changed "Easy to solve?" via inline edits
http://dev.tiki.org/tiki-tracker_view_history.php?itemId=4995

Jonny Bradley 14 Apr 14 18:09 GMT-0000

I changed the importance on one of the monitoring wishes and it shows up here
http://dev.tiki.org/tiki-tracker_view_history.php?itemId=4702 - did i miss something?

Xavier de Pedro 20 May 16 09:16 GMT-0000

Item description indicates that the issue showed up when new content was added in a field, not when changing some value. Re-categorizing to "please retest" since that was reported a few years ago.
