### Description

You can set a tracker to hold more user information.

On the tiki preferences (tiki-user\_preferences.php) it will set a link "User's personal tracker information: View extra information".

With tiki in english the link will go to the user (latin-char or non-latin-char) i'm look at.

If the Tiki is set to multilingual the link is broken and will show my own (admin for example) information.

### Solution

It is fixed, may be some tracker fields fixing help that

Hi Bernard,

I accessed your SHOW and thank you for configuring the tiki to demo the bug. But I tried following your steps and can't find what you described.

I tried English and French and everything seems fine. Maybe I'm missing a step somewhere.

Having a screenshot or video capture would help

thanks
