Description
Thanks, Marc.

I had all the minify's set on tiki-admin.php

I first unchecked:
Minify CSS into a single file (found in performance)
and got:
Invalid CSS property declaration at: .
temp/public/minified_b0ce6c498b992dbbce71a8e58b27e5e9.css:4

Invalid CSS selector: input.ui-button
-moz-focus-inner,button.ui-button
-moz-focus-inner temp/public/minified_9853f6dd93c8f0e01d7638e38b456649.css:19
Invalid CSS property value: #blue temp/public/minified_814bb502a7fbafe471223475b3b5128f.css:1
Invalid CSS property name: -webkit-overflow-scrolling
temp/public/minified_6df987c4671ceba4d5b952189c509395.css:1
Invalid CSS property declaration at: . design.css:2528

Clearing caches didn't help. I then unchecked
Minify CSS (found in performance)
and got:
Invalid CSS property declaration at: . lib/codemirror_tiki/codemirror_tiki.css:32

Invalid CSS selector: input.ui-button

-moz-focus-inner, button.ui-button
-moz-focus-inner vendor/jquery/jquery-ui-themes/themes/flick/jquery-ui.css:222
Invalid CSS property name: -webkit-overflow-scrolling
vendor/jquery/plugins/colorbox/example1/colorbox.css:9
Invalid CSS property declaration at: . design.css:2528
Invalid CSS property value: #blue temp/public/codemirror_modes.css:94
Invalid CSS property declaration at: ; temp/public/codemirror_modes.css:219

Looks like it was fixed based on the DevList conversation with the same title
