Description

Like:

<https://drupal.org/project/poormanscron>

Useful for Update notifier, Newsletter throttling, etc.

This will be important in order to make Unified Index default in Tiki (reindexing of the site every week or so)

In theory, the batch todo for tracker events is firable from external cron with TOKEN access.

This worked at some point in Tiki6 after some work by Rodrigo, but it could be very well be broken in recent versions.
