This is an example

`img src="img/icons/world_edit.png" alt="Edit" width="16" height="16" title="Toggle interactive translation on" class="icon"`

Step 1: Add string with quotes

Step 2: Post the comment

Step 3: Edit the comment

Step 4: Save the comment

> Data is now corrupted

this is the test case. So, I don't have any more info.

nextdev seems to work fine.
