Description
    Tiki directory was closed down from anonymous viewing for security reasons.

    This section should stay restricted:
    http://tikiwiki.org/tiki-directory_browse.php?parent=2

    But the rest of the directory can be available.

    How can we do this via permissions or category permissions?

As per Tiki23 nothing to do with that now and Directory is part of deprecated (candidate for removal) features:
