Description

This url:

<https://nextdoc.tiki.org/tiki-print.php?page=Documentation&display=pdf>

comes from clicking at the PDF icon of the homepage, as a non-admin user logged in (in case it matters), and it produced a white screen with this error message:

"Unable to generate PDF"

most of the time its the server setup that is not configured for PDF generation

Xavier de Pedro 06 Nov 13 16:51 GMT-0000

I don't have access to the server to check that, since the big community server was in place (a few years ago) and doc.t.o was hosted there.
