Description

Here is a URL:

<http://suite.tiki.org/tiki-pagehistory.php?page=Tiki+Suite+Slideshow>

Say I want to check the history and share a URL, I click "history" and then "compare", I get:

http://suite.tiki.org/tiki-pagehistory.php?page=Tiki+Suite+Slideshow&history_offset=1&diff_style=side_diff&diff_style=sidediff&show_all_versions=y&compare=Compare&newver=0&oldver=125&tra_lang=sq&paginate=on&history_pagesize=200

This is long and has things which are not useful to share the link.

So let's look at the params:

page=Tiki+Suite+Slideshow	Needed
history_offset=1	Not needed
diff_style=sidediff	Needed only if different than the default diff
diff_style=sidediff	this is there twice
show_all_versions=y	Not needed
compare=Compare	Why do we need this?
newver=0	Needed. 0 seems to be for latest. So if omitted, it should
oldver=125	Needed
tra_lang=sq	Not needed
paginate=on	Not needed
history_pagesize=200	Not needed

So diff_style=sidediff is there twice

I would want the simple one to be like this:

Compare version 120 to current:

<http://suite.tiki.org/tiki-pagehistory.php?page=Tiki+Suite+Slideshow&oldver=120>

Compare any two versions:

<http://suite.tiki.org/tiki-pagehistory.php?page=Tiki+Suite+Slideshow&newver=124&oldver=120>

And if diff style is different from site default:

http://suite.tiki.org/tiki-pagehistory.php?page=Tiki+Suite+Slideshow&newver=124&oldver=120&diff_style=unidiff

Thanks!

Solution

Unwanted parameters are removed from tiki-pagehistory.php URL.

It seems the diff version pagination on [tiki-pagehistory.php](#) is broken in 15 and i suspect this commit [r49450](#) maybe be responsible, but that would mean it's been broken since 13.x - can that be true?

Investigating...

Jonny Bradley 01 May 16 18:00 GMT-0000

Also, he's changed it from a GET form to a POST one so you can't copy and share the url anyway - totally missed the point i think... what a mess 😞

Marc Laporte 14 Jan 17 22:58 GMT-0000

I don't think Mani reverted the commit as requested. Sorry about that Jonny. I think you had to fix when doing this?

<http://sourceforge.net/p/tikiwiki/code/59608>

I am ready to close this task with Fabio's commits:

<https://sourceforge.net/p/tikiwiki/code/60053>

<https://sourceforge.net/p/tikiwiki/code/60054>

ok?

Yes, it's lots better since Fabio's fixes -
shame we couldn't get it done by
simplifying the underlying code, covering
up mess and complexity will cause trouble
down the line but i guess this is good
enough for now 😊

Yes, missing a quick way to share a url of diff between 2 versions.
Regression introduced.

Sorry for hijacking 😊

In the description of this ticket the long url (long series of char without space) is stick
out of the sides of the columns.

Regression ?

Shouldn't we fixed this with <https://sourceforge.net/p/tikiwiki/code/60305> ?

Or may be same fix should be applied here too ?
