Description

We have two calendar interfaces in Tiki. The newer FullCalendar and the legacy code. This is more work to maintain, etc.

- Upgrade FullCalendar to latest version. Decide if we use
 - latest version <http://blog.arshaw.com/1/post/2013/09/fullcalendar-news.html>
 - or stick with the one we use now FullCalendarResourceViews, which is needed for the PluginTrackerCalendar, its development gets in sync every now and then with the original FullCalendar, and allows to do ressource planning:
<https://github.com/jarnokurlin/fullcalendar>
- Review any FullCalendar issues such as:
 - <https://dev.tiki.org/item4248> <https://doc.tiki.org/FullCalendar>
 - <https://dev.tiki.org/item4993> - FullCalendar doesn't show in Mobile mode in 12.x LTS
- Remove legacy code and put FullCalendar as the always on default way to show calendars
- And then, Make FullCalendar use Bootstrap classes and be responsive

what are the pros and cons of upgrading to new full calendar?

Marc Laporte 25 Nov 13 06:09 GMT-0000

Here is flash video:

```
{flash type="url" movie="display631" width="810" height="722"}
```

Xavier de Pedro 25 Nov 13 07:45 GMT-0000

full calendar: not all fields from Tiki calendars were covered in Tiki9, check for that in tiki12 for instance before removing

Marc Laporte 25 Nov 13 08:19 GMT-0000

Pros:

- Long term less code to maintain
- We use FullCalendar with Resource Views for PluginTrackerCalendar so we are already maintaining it

Cons:

- Needs work to pull out old code
- We may discover missing features

FullCalendar v3.5.0 adds Bootstrap support

<https://github.com/fullcalendar/fullcalendar/blob/master/CHANGELOG.md#v350>

We want a view of more than one month:

Year View with 12 Mini-Calendars

<https://github.com/fullcalendar/fullcalendar/pull/3694>

Marc Laporte 16 Dec 17 15:20 GMT-0000

Work has started. For sure in Tiki19.x, but perhaps Tiki18.x if accepted as a bug fix by the community

Torsten Fabricius 10 Apr 18 11:52 GMT-0000

I have one issue with fullcalender, that makes me to not like using it:

When I am logged in with edit permission and I click on fullcalender items, they open in edit mode, even when I am not logged in for the reason of editing calendar items at all, but to edit other stuff and simply need to use the fullcalender.

If there would be a clearly visible icon or button (for users with permission) to click on and then switch between biew mode and edit mode - off-by-default or default on/off to be set by the calendar admin or the global admin, then I would be more that fine to like using fullcalendar.

Regards and thx for the work and engagement!

Torsten

- Moved from old no-longer support fork fullcalendar-resourceviews to latest and greatest official FullCalendar, and Scheduler (GPL) available via Packages ->
<https://sourceforge.net/p/tikiwiki/code/66298>

Also using Bootstrap 4!

Why keep 2 calendar interfaces? What is FullCalendar missing?

Marc Laporte 01 Nov 18 13:07 GMT-0000

FullCalendar should now be at feature parity with the non FullCalendar interface.

<https://sourceforge.net/p/tikiwiki/code/68193>

We can keep both a bit longer, but I think we should converge to a single interface, at the latest after Tiki21LTS

How about this?

- Tiki19: FullCalendar was massively improved
- Tiki 20: FullCalendar by default
- Tiki 21LTS: Last version with both options
- Tiki 22+: Only FullCalendar

Jonny Bradley 01 Nov 18 13:40 GMT-0000

Sounds good to me, thanks Marc (and team!) - to be honest i was a little surprised it wasn't the default already, but too late for 19.x now i think.

Xavier de Pedro 02 Nov 18 23:05 GMT-0000

+1, thanks Marc, good plan!

Michael Imbeault 01 Sep 20 17:42 GMT-0000

That's sound good ! FullCalendar need to be by default!

hman 01 Sep 20 22:44 GMT-0000

One remark from your fellow translator: Please keep in mind that other languages than English have different orders for year, month and day, and other separators than slashes. German uses "dd.mm.yyyy" and Japanese "yyyy-mm-dd" for instance. There are prefs to deal with that, the calendar in 18 ignores them mostly... Thanks...

Marc Laporte 30 Aug 22 12:48 GMT-0000

@**hman** This is off-topic

Marc Laporte 30 Aug 22 12:49 GMT-0000

Legacy calendar interface was removed, and we are full on FullCalendar!
