Description
I had my issues with the way the module mod-last_modif_pages.tpl rendered... the title could be hidden by a "decorations=n" which made the link to the addition changes vanish, plus the link in the module title is a little bit of a break with the remaining styling...

Then I discovered that the module uses a table instead of a OL or UL to format, which is a little bit messy itself.

Solution
This is what my module template now looks like:

Notice the use of a list instead of a table and the last line of "More changes...". This begged for a new
style, "changelist", which looks like this.

```css
.changelist {
  list-style-type: decimal;
  list-style-position: outside;
  margin: 0px;
  width: 10em;
  padding-top: 0pt;
  padding-bottom: 0pt;
  padding-left: 24pt;
  padding-right: 0pt;
}

.changelist_item {
}
```
