Description

When using PluginMap to show geo-located tracker items, when a location pointer icon is clicked the popup is underneath the map instead of on top of it.

Here are the steps to recreate:

1. Create a tracker item with a location field
2. Add location information to the tracker item
3. Use the following tiki syntax in a page (tracker id is assumed to be 1):

```
{MAP(scope="center" controls="controls, layers, levels, scale, navigation" popupstyle="dialog" width="300" height="300" center="-73.9590113593426,40.792087037500615,12" )}
{searchlayer tracker_id="1" type="trackeritem"} {MAP}
```
