

```
if (strpos($_SERVER['SCRIPT_NAME'], 'tiki-register') === false) {
    $cachelib->cacheItem($cacheName, serialize(array($menu_info, $channels)),
    $cacheType);
}
```

Another workaround:

create a cron job to clear the cache with this command:

```
ls -1d ./temp/cache/* |grep -v -e index.php | xargs -r /bin/rm
```

Thanks to jcarter for documenting this bug. My users are frustrated because they add things and can't find them later since they haven't been added to the menu. For me, this structure-as-menu is the default setup for all the tiki sites I create. Now, I have to go in and clear the cache every time to update the menu. I am thinking of creating a cron job that runs the following command to clear the cache:

```
ls -1d ./temp/cache/* |grep -v -e index.php | xargs -r /bin/rm
```

But then that means the cache is cleared once a day whether or not someone has edited the site. Not too efficient. And, if someone does add a page, they have to wait 24 hours to see it. Not the instant feedback they are looking for.

I'll try setting the cache to 10 minutes and see if it has any effect.

gezza 09 Apr 15 18:03 GMT-0000

still there in tiki14 (cache needs to be cleared in order to have new structure items appear in a menu

module)

probably not the whole cache should be emptied, only the cached menu, will look into it

seems like tiki does not check if the given structure is in a menu module or not, so this needs to be developed

r55619 committed, please test

Wiebe 08 Feb 18 08:29 GMT-0000

This bug is still there in TikiWiki version 17! Anyone who can fix this?

Bernard Sfez / Tiki Specialist 13 Feb 18 15:33 GMT-0000

Wiebe we release Tiki18 (under the radar) 😊 can you check if the issue is still on our last release ?

It is unlikely they will be more fixes on Tiki 17 now.

Thanks !

Wiebe 14 Feb 18 06:45 GMT-0000

Hi Bernard, I 'fixed' this problem in Tiki17.

I have used a horizontal menu structure module instead of the vertical menu on the left side.

Somehow the caching problem isn't a issue in the horizontally module, that could be the reason why there are not more reports on this issue.

Bernard Sfez / Tiki Specialist 14 Feb 18 08:09 GMT-0000

Great news, please update and close this ticket, thanks.

Doug Higby 18 Mar 19 14:22 GMT-0000

I have only ever had this problem using the horizontal menu. In Tiki 18 the problem still existed, and so I gave up and stopped using structure menus.
