Description
    As a registered user I try to create a contact, I click on the save button and then I get the following
    page with this error (By the way the contact is saved):

    The following error message was returned:

    You have an error in your SQL syntax; check the manual that corresponds to your MySQL server
    version for the right syntax to use near 'AS x FROM `tiki_webmail_contacts_ext` AS x LEFT JOIN
    `tiki_webmail_contacts_fiel' at line 1

    The query was:
    DELETE `tiki_webmail_contacts_ext`.* AS x FROM `tiki_webmail_contacts_ext` AS x LEFT JOIN
    `tiki_webmail_contacts_fields` AS f ON x.`fieldId`=f.`fieldId`WHERE x.`contactId`=? AND
    f.`flagsPublic`='n' AND f.`user`=?

    Values:

    1. 2
    2. John Doe

    The built query was likely:
    DELETE `tiki_webmail_contacts_ext`.* AS x FROM `tiki_webmail_contacts_ext` AS x LEFT JOIN
    `tiki_webmail_contacts_fields` AS f ON x.`fieldId`=f.`fieldId`WHERE x.`contactId`='2' AND
    f.`flagsPublic`='n' AND f.`user`='John Doe'

The extra fields like "City" and so on, are not saved.
Logged in as a admin I do not get this fault (not on my own installation nor on the show.tikiwiki.org)
I have seen this error in version 11 too, but did not pay attention to it because it was my first use of Tiki.

Solution
  The SQL error made the whole site get in error mode when a normal user adds a contact.
  SQL query obviously wrong and easy to fix.

  Funny thing is, no error in Tiki 9.x, yet the query is the same there.

  Committed revision 49381. Thank you for the report
